JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

these attacks that came under my observation consisted only of a few jabs of the beak on any part of the body, and none ended seriously." Two half-tone plates give four illustrations of scenes in gull life.—J. A. A.

Game Laws for 1906.¹—This is the usual annual summary of the game laws revised and brought down to date, so as to include not only all the new legislation, but a summary of the more important bills which were considered and failed to pass. It is a condensed statement of the game laws of the United States and Canada, which govern seasons, shipment, sale, licenses, and other limitations, and is of the greatest interest and use to both game protectors and sportsmen, as well as to shippers and dealers in game. The legislation during 1906 was especially important in the Canadian Provinces, five of which passed new game laws, Alberta passing a law prohibiting spring shooting of water fowl. "The passage of the Mississippi statute marks the completion of a chain of nonexport laws in every State of the Union and provision for the appointment of special officers to enforce the game laws in every State except Alabama, Arkansas, and Texas." Several new preserves were established by Congress, and other preserves were made in the Provinces of Alberta and Quebec. Thus is progress made from year to year in the preservation of game almost throughout the continent.—J. A. A.

Forbush's 'Useful Birds and their Protection.'—In this volume² of over 450 pages, with numerous illustrations, we have set before us, by authorization of the Legislature of Massachusetts, one of the most important works yet published relating to the economic relations and protection of birds. By predilection, temperament, opportunities, and familiarity with his subject, the author is well fitted to deal fairly and exhaustively with the important topic here considered—the food relations of birds to agriculture, and hence the utility of birds to man. An introduction of 22 pages deals in a general way with 'The Utility of Birds in Nature,' while the succeeding twelve chapters treat of different phases of the general subject, and with the enemies of birds, and means for their protection. The chapter headings may here be cited as indicating the scope and general character of the work, as follows: 1. The Value of Birds

¹ Game Laws for 1906. A Summary of the provisions relating to seasons, shipment, sale, and licenses. By T. S. Palmer and R. W. Williams, Jr., Assistants, Biological Survey. U. S. Department of Agriculture. Farmers' Bulletin No. 265, 8vo, pp. 54, with maps and tables. Washington Government Printing Office, 1906.

² Useful Birds and their Protection. Containing Brief Descriptions of the more common and useful Species of Massachusetts, with Accounts of their Food Habits, and a Chapter on the Means of Attracting and Protecting Birds. By Edward Howe Forbush, Ornithologist to the Massachusetts State Board of Agriculture. Illustrated by the Author, C. Allan Lyford, Chester A. Reed, and others. — Published under Direction of the Massachusetts State Board of Agriculture, by authority of the Legislature.—No date. 8vo, pp. i-xx, 1-437, with 171 text figures, colored frontispiece, and 56 half-tone plates. (Received March 18, 1907.)
